

Basic Financial Accounting

Accounting is the language of business. It provides a framework for capturing business transactions in a coherent manner. More formally, accounting is defined as “the process of identifying, measuring, and communicating economic information to permit judgments and decisions by users of the information.” This course will provide participants with a good understanding of accounting and how the accountant thinks about transactions. With the knowledge, participants will gain a strong foundation to comprehend financial information contained in financial statements.

The following topics will be covered:

- Introduction to Accounting and Business
- Analyzing Transactions
- The Adjusting Process
- Completing the Accounting Cycle
- Accounting Systems
- Accounting for Merchandising Businesses Inventories
- Sarbanes-Oxley, Internal Controls, and Cash
- Receivables
- Fixed Assets and Intangible Assets
