Credit Card Fraud

Matt Fluegge, Executive Consultant, Worldpay

Credit card fraud is a risk that merchants are exposed to when accepting credit cards as a form of payment. This risk varies based on the environments in which card payments are accepted and the merchant's industry type. The presentation will discuss these risks and mitigation considerations.

AI and the Credit Department

*Thomas Fawkes and Brian Jackiw, Partners
Tucker Ellis LLP*

While artificial intelligence (AI) has been around for decades, there have been enormous advances in the technology over the past several years that have now made it viable for business applications, including credit. AI stands to transform the credit industry as we know it, and the benefits of AI are apparent: automation of customer onboarding and underwriting, predictive analytics, data management, collections, and forecasting is now possible, which could in the future substantially expedite decision making and reduce credit department labor costs. There are, however, substantial risks: the technology is still developing, is still prone to errors, and cannot – at least at this time – navigate around unforeseen events and replace the experience and judgment of tenured (human) credit professionals. During this presentation, we will discuss the benefits and opportunities of integrating AI into your company's credit function, along with the legal and business risks and challenges associated with the current AI technology.

The Impact of Bankruptcies - Deeper than You Think

James Brown, Founder and Owner, BKwire.com

In the year 2023, more than 18,000 businesses filed for bankruptcy, which affected over 400,000 creditors. Such bankruptcy filings can have significant impacts on your company, and it's crucial to be aware of the potential risks. If one of your customers files for bankruptcy, it can negatively affect your business, and the impact can even extend beyond that if your customer's customer also files for bankruptcy.

In this session, we will delve into this topic in greater detail and learn how to use data to uncover the hidden effects of bankruptcy filings on your business. It's important to take proactive measures to safeguard your company and arm yourself with the knowledge you need to mitigate the risks and protect your business in the long run.
